Author Index to Volume 2

References with (E) indicate Errata. Volume number (boldface) and year are included in this index. It will be noted that there are no references to "see someone else" in the Author Index. Although it has meant a little duplication, there have been included under each author all articles in which he was author or co-author. All articles in which the author has participated are arranged in the chronological order of publication. A bibliography with author names arranged as in the original article is obtained by insertion of the author's name in the indicated (——) space under each indexed name.

Andrews, Frank C.
Henin, F., P. Résibois, and ——. On the general theory of the approach to equilibrium. II. Interacting particles. **2**: 68—1961
—— On the general theory of the approach to equilibrium. III. Inhomogeneous systems. **2**: 91—1961

Araki, Huzihiro
—— Generalized retarded functions and analytic function in momentum space in quantum field theory. **2**: 163—1961
—— On the connection of spin and commutation relations between different fields. **2**: 267—1961

Bardakci, K.
Sudarshan, E. C. G. and ——. Nature of the axioms of relativistic quantum field theory. I. **2**: 767—1961

Barut, A. O. and K. H. Ruei. Analytical properties of S matrix and uniqueness of the scattering potential. **2**: 181—1961

Baym, Gordon and N. David Mermin. Determination of thermodynamic Green's function. **2**: 232—1961

Biedenharn, L. C. Wigner coefficients for the R_4 group and some applications. **2**: 433—1961

Bremermann, H. J. and L. Durand, III. On analytic continuation, multiplication, and Fourier transformations of Schwartz distributions. **2**: 240—1961

Bros, J., A. Messiah, and R. Stora. A problem of analytic completion related to the Jost-Lehmann-Dyson formula. **2**: 639—1961

Broyles, A. A. Probability distribution for classical fluids. **2**: 848—1961

Carlson, B. C. Ellipsoidal distributions of charge or mass. **2**: 441—1961

Carpenter, Chester P. and Fritz W. Mezger. General spherical harmonics formulation of plasma Boltzmann equation. **2**: 694—1961

Chasman, Richard R. Eigenvalue problems in matrix mechanics. **2**: 733—1961

Cohen, Hirsh and W. L. Miranker. Boundary-layer behavior in the superconductor transition problem. **2**: 575—1961

Conlan, James, J. B. Diaz, and W. E. Parr. On the capacity of the icosahedron. **2**: 259—1961

Cook, J. M. Asymptotic properties of a boson field with given source. **2**: 33—1961

Curtis, R. B.
Wellner, M. and ——. Role of the asymptotic condition in a Lagrangian field theory. **2**: 651—1961

Curtiss, C. F.
Gioumousis, George and ——. Molecular collisions. II. Diatomic molecules. **2**: 96—1961

Dell'Antonio, G. F. Support of a field in p space. **2**: 759—1961

DeWitt, Bryce S. Quantization of fields with infinite-dimensional invariance groups. **2**: 151—1961

Diaz, J. B.
Conlan, James, ——, and W. E. Parr. On the capacity of the icosahedron. **2**: 259—1961

Domb, C. and M. F. Sykes. Use of series expansions for the Ising model susceptibility and excluded volume problem. **2**: 63—1961

Dresner, Lawrence. Isoperimetric and other inequalities in the theory of neutron transport. **2**: 829—1961

Durand, L., III
Bremermann, H. J. and ——. On analytic continuation, multiplication, and Fourier transformations of Schwartz distributions. **2**: 240—1961

Eden, R. J., P. V. Landshoff, J. C. Polkinghorne, and J. C. Taylor. Acnodes and cusps on Landau curves. **2**: 656—1961

Essam, John W.
Fisher, Michael E. and ——. Some cluster size and percolation problems. **2**: 609—1961

Feldman, D.
Kowalski, K. L. and ——. Transition matrix for nucleon-nucleon scattering. **2**: 499—1961

Fisher, Michael E.
—— **and John W. Essam.** Some cluster size and percolation problems. **2**: 609—1961
—— Critical probabilities for cluster size and percolation problems. **2**: 620—1961

Fletcher, John E.
Struble, Raimond A. and ——. General perturbational solution of the harmonically forced van der Pol equation. **2**: 880—1961

Fontana, Peter R. Symmetric expansion of one- and two-center Coulomb potentials. **2**: 825—1961

Ford, Joseph. Equipartition of energy for nonlinear systems. **2**: 387—1961

Frisch, Ivan T. and Wan H. Kim. Properties of 2-semi-isomorphic graphs and their applications: active network analysis. **2**: 627—1961

Fronsdal, Christian. Analyticity of Wightman functions. **2**: 748—1961

Gioumousis, George
—— **and C. F. Curtiss.** Molecular collisions. II. Diatomic molecules. **2**: 96—1961
—— Molecular collisions. III. Symmetric top molecules. **2**: 723—1961

Goldberg, J. N.
—— **and R. P. Kerr.** Some applications of the infinitesimal-holonomy group to the Petrov classification of Einstein spaces. 2: 327—1961
Kerr, R. P. and ——. Einstein spaces with four-parameter holonomy groups. 2: 332—1961
Green, H. S. Theories of transport in fluids. 2: 344—1961
Grossman, Alex
—— **and Tai Tsun Wu.** Schrödinger scattering amplitude. I. 2: 710—1961
—— Schrödinger scattering amplitude. II. 2: 714—1961
Guth, E. and E. Inönü. Group-theoretical treatment of time- and energy-dependent multiple scattering with application to the slowing-down of neutrons. 2: 451—1961

Hammersley, J. M. Comparison of atom and bond percolation processes. 2: 728—1961
Henin, F., P. Résibois, and F. Andrews. On the general theory of the approach to equilibrium. II. Interacting particles. 2: 68—1961
Hjalmars, Stig. Wave equations for scalar and vector particles in gravitational fields. 2: 663—1961

Inönü, E.
Guth, E. and ——. Group-theoretical treatment of time- and energy-dependent multiple scattering with application to the slowing-down of neutrons. 2: 451—1961
Israel, W. and R. Trollope. New possibilities for a unified field theory. 2: 777—1961

Jepsen, Donald W.
Maradudin, Alexei A., George H. Weiss, and ——. Nonequilibrium processes in isotopically disordered crystals. 2: 349—1961
Jordan, Thomas F. and E. C. G. Sudarshan. Dynamical mappings of density operators in quantum mechanics. I. 2: 772—1961

Karp, Samuel N.
Zitron, Norman and ——. Higher-order approximations in multiple scattering. I. Two-dimensional scalar case. 2: 394—1961
Zitron, Norman and ——. Higher-order approximations in multiple scattering. II. Three-dimensional scalar case. 2: 402—1961
Katz, Sylvan. On a moving boundary problem. 2: 149—1961
Keller, Joseph B. Lower bounds and isoperimetric inequalities for eigenvalues of the Schrödinger equation. 2: 262—1961
Kerr, R. P.
Goldberg, J. N. and ——. Some applications of the infinitesimal-holonomy group to the Petrov classification of Einstein spaces. 2: 327—1961
—— **and J. N. Goldberg.** Einstein spaces with four-parameter holonomy groups. 2: 332—1961
Kibble, T. W. B. Lorentz invariance and the gravitational field. 2: 212—1961
Kim, Wan H.
Frisch, Ivan T. and ——. Properties of 2-semi-isomorphic graphs and their applications: active network analysis. 2: 627—1961
Knight, James M. Strict localization in quantum field theory. 2: 459—1961

Woo, Ching-Hung

Wichmann, Eyvind H. and ——. Integral representation for the nonrelativistic Coulomb Green's function. **2**: 178—1961

Wu, Tai Tsun

—— Some nonequilibrium properties of a Bose system of hard spheres at extremely low temperatures. **2**: 105—1961

—— Theory of the dipole antenna and the two-wire transmission line. **2**: 550—1961

Grossmann, Alex and ——. Schrödinger scattering amplitude. I. **2**: 710—1961

—— Transient response of a dipole antenna. **2**: 892—1961

Yabushita, Shin. Tschebyscheff polynomial approximation method of the neutron-transport equation. **2**: 543—1961

Żelazny, Roman. Exact solution of a critical problem for a slab. **2**: 538—1961

Zitron, Norman

—— **and Samuel N. Karp.** Higher-order approximations in multiple scattering. I. Two-dimensional scalar case. **2**: 394—1961

—— **and Samuel N. Karp.** Higher-order approximations in multiple scattering. II. Three-dimensional scalar case. **2**: 402—1961

Zwanzig, Robert

—— Nonequilibrium processes in isotopically disordered crystals. Dependence on degree of order. **2**: 370—1961

Rubin, Robert J. and ——. A lattice with an unusual frequency spectrum. **2**: 861—1961

Analytic Subject Index to Volume 2

Analysis

Differential Equations

Method for defining principal modes of nonlinear systems utilizing infinite determinants, Demetrios G. Magiros. 2: 869—1961

A note on the algebraic aspect of the integration of a system of ordinary linear differential equations, Eyvind H. Wichmann. 2: 876—1961

Boundary-layer behavior in the superconductor transition problem, Hirsh Cohen and W. L. Miranker. 2: 575—1961

General perturbational solution of the harmonically forced Van der Pol equation, Raimond A. Struble and John E. Fletcher. 2: 880—1961

On a moving boundary problem, Sylvan Katz. 2: 149—1961

Remarks on the continued fraction calculation of eigenvalues and eigenvectors, Jerome D. Swalen and Louis Pierce. 2: 736—1961

Continuum Physics, Classical

Electrical conduction in a noncircular rod, A. C. Pipkin and R. S. Rivlin. 2: 865—1961

Electrical conduction in a stretched and twisted tube, A. C. Pipkin and R. S. Rivlin. 2: 636—1961

Distribution Functions

Ellipsoidal distributions of charge or mass, B. C. Carlson. 2: 441—1961

Probability distribution for classical fluids, A. A. Broyles. 2: 848—1961

Field Theory, Quantum

Axiomatic Approach

Acnodes and cusps on Landau curves, R. J. Eden, P. V. Landshoff, J. C. Polkinghorne, and J. C. Taylor. 2: 656—1961

A criterion for the free character of fields, Jan Lopuszanski. 2: 743—1961

A problem of analytic completion related to the Jost-Lehmann-Dyson formula, J. Bros, A. Messiah, and R. Stora. 2: 639—1961

Asymptotic properties of a boson field with given source, J. M. Cook. 2: 33—1961

Free quantized Lorentzian fields, J. Schwartz. 2: 271—1961

Generalized retarded functions and analytic function in momentum space in quantum field theory, Huzihiro Araki. 2: 163—1961

On the connection of spin and commutation relations between different fields, Huzihiro Araki. 2: 267—1961

Strict localization in quantum field theory, James M. Knight. 2: 459—1961

The nature of the axioms of relativistic quantum field theory, E. C. G. Sudarshan and K. Bardakci. 2: 767—1961

Quantum Electrodynamics

Free propagator expansion in the evaluation of the Lamb shift. I., Arthur J. Layzer. 2: 292—1961

Free propagator expansion in the evaluation of the Lamb shift. II., Arthur J. Layzer. 2: 308—1961

Null electromagnetic fields, Ivor Robinson. 2: 290—1961

Quantum Field Theory, General Aspects

Role of the asymptotic condition in a Lagrangian field theory, M. Wellner and R. B. Curtis. 2: 651—1961

Synthetic approach and canonical variables in a nonlocal field theory, Smio Tani. 2: 46—1961

Graph Theory

Comparison of atom and bond percolation processes, J. M. Hammersley. 2: 728—1961

Critical probabilities for cluster size and percolation problems, Michael E. Fisher. 2: 620—1961

Properties of 2-semi-isomorphic graphs and their applications: Active network analysis, Ivan T. Frisch and Wan H. Kim. 2: 627—1961

Some cluster size and percolation problems, Michael E. Fisher and John W. Essam. 2: 609—1961

Some counting theorems in the theory of the Ising model and the excluded volume problem, M. F. Sykes. 2: 52—1961

Use of series expansions for the Ising model susceptibility and excluded volume problem, C. Domb and M. F. Sykes. 2: 63—1961

Group Theory and Symmetry Operations

Complex orthogonal and antiorthogonal representation of Lorentz group, Behram Kurşunoğlu. 2: 22—1961

Contraction of Lie groups, Eugene J. Saletan. 2: 1—1961

Dynamical mappings of density operators in quantum mechanics, Thomas F. Jordan and E. C. G. Sudarshan. 2: 772—1961

Einstein spaces with four-parameter holonomy groups, R. P. Kerr and J. N. Goldberg. 2: 332—1961

Some applications of the infinitesimal-holonomy group to the Petrov classification of Einstein spaces, J. N. Goldberg and R. P. Kerr. 2: 327—1961

Wigner coefficients for the R_4 group and some applications, L. C. Biedenharn. 2: 433—1961

Isoperimetric Inequalities

Isoperimetric and other inequalities in the theory of neutron transport, Lawrence Dresner. 2: 829—1961

Lower bounds and isoperimetric inequalities for eigenvalues of the Schrödinger equation, Joseph B. Keller. 2: 262—1961

On the capacity of the icosahedron, James Conlan, J. B. Diaz, and W. E. Parr. 2: 259—1961

Lattice Dynamics

A lattice with an unusual frequency spectrum, Robert J. Rubin and Robert Zwanzig. 2: 861—1961

Frequency spectrum of a disordered one-dimensional lattice, J. S. Langer. 2: 584—1961

Nonequilibrium processes in isotopically disordered crystals, Alexei A. Maradudin, George H. Weiss, and Donald W. Jepsen. 2: 349—1961

Nonequilibrium processes in isotopically disordered crystals. Dependence on degree of order, Robert Zwanzig. 2: 370—1961

Statistical dynamics of simple cubic lattices. Model for the study of Brownian motion. II., Robert J. Rubin. 2: 373—1961

Matrices
A note on k-commutative matrices, D. W. Robinson. 2: 776—1961
Eigenvalue problems in matrix mechanics, Richard B. Chasman. 2: 733—1961
Calculation of the eigenvalues of a tridiagonal Hermitian matrix, Louis Pierce. 2: 740—1961

Radiation
Theory of multipole radiation, S. C. Snowdon. 2: 719—1961
Theory of the dipole antenna and the two-wire transmission line, Tai Tsun Wu. 2: 550—1961
Transient response of a dipole antenna. Tai-Tsun Wu. 2: 892—1961

Relativity
Approximate stress energy tensor for gravitational fields, A. H. Taub. 2: 787—1961
Coordinate conditions, J. Plebanski and J. Ryten. 2: 677—1961
Geometry of light paths between two material bodies, E. P. Wigner. 2: 207—1961
Lorentz invariance and the gravitational field, T. W. B. Kibble. 2: 212—1961
New approach to the Einstein and Maxwell-Einstein field equations, Ezra T. Newman. 2: 674—1961
New approach to Einstein's empty space field equations, E. T. Newman and L. A. Tamburino. 2: 667—1961
New possibilities for a unified field theory, W. Israel and R. Trollope. 2: 777—1961
On the interpretation of the Einstein-Schrödinger unified field theory, D. W. Sciama. 2: 472—1961
Quantization of fields with infinite-dimensional invariance groups, Bryce S. DeWitt. 2: 151—1961
Some properties of empty space-time, E. Newman. 2: 324—1961
Wave equations for scalar and vector particles in gravitational fields, Stig Hjalmars. 2: 663—1961

Scattering Theory
Absolute definition of phase shift in the elastic scattering of a particle from compound systems, A. Temkin. 2: 336—1961
Analytical properties of S matrix and uniqueness of the scattering potential, A. O. Barut and K. H. Ruei. 2: 181—1961
Application of a singular wave-function operator in scattering theory, Robert A. Mapleton. 2: 482—1961
Foundations for a treatment of the scattering of light by the hydrodynamical and statistical atom model, Masami Wakano. 2: 803—1961
Higher-order approximations in multiple scattering. I. Two-dimensional scalar case, Norman Zitron and Samuel N. Karp. 2: 394—1961
Higher-order approximations in multiple scattering. II. Three-dimensional scalar case, Norman Zitron and Samuel N. Karp. 2: 402—1961
Modification of effective-range theory in the presence of a long-range (r^{-4}) potential, Thomas F. O'Malley, Larry Spruch, and Leonard Rosenberg. 2: 491—1961
Multiple scattering of waves, P. C. Waterman and Rohn Truell. 2: 512—1961
Products of principal value singularities used in the formal theory of scattering, S. Tani. 2: 198—1961
Schrödinger scattering amplitude. I., Alex Grossman and Tai Tsun Wu. 2: 710—1961
Schrödinger scattering amplitude. II., Alex Grossman. 2: 714—1961
Structure of the many-channel S matrix, Roger G. Newton. 2: 188—1961
The principles of limiting absorption and limiting amplitude in scattering theory. I. Schrödinger's equation, Farouk M. Odeh. 2: 794—1961
The principles of limiting absorption and limiting amplitude in scattering theory. II. The wave equation in an inhomogeneous medium, Farouk M. Odeh. 2: 800—1961
Transiton matrix for nucleon-nucleon scattering, K. L. Kowalski and D. Feldman. 2: 499—1961

Special Functions
Analyticity of Wightman functions, Christian Fronsdal. 2: 748—1961
Characteristic Coulomb Green's function and its eigenfunction expansion, Robert A. Mapleton. 2: 478—1961
Integral representation for the nonrelativistic coulomb Green's function, Eyvind H. Wichmann and Ching-Hung Woo. 2: 178—1961
Symmetric expansion of one- and two-center Coulomb potentials, Peter R. Fontana. 2: 825—1961

Statistical Mechanics, Equilibrium Theory and the Many-Body Problem
Almost periodicity and the quantal H theorem, Ian C. Percival. 2: 235—1961
A note on the Albertoni-Bocchieri-Loinger theorem of classical statistical mechanics, J. S. Lomont. 2: 858—1961
Construction of symmetry-adapted functions in the many-particle problem, R. K. Nesbet. 2: 701—1961
Determination of thermodynamic Green's functions, Gordon Baym and N. David Mermin. 2: 232—1961
Exact statistical mechanics of a one-dimensional system with Coulomb forces, A. Lenard. 2: 682—1961
Exact wave functions in superconductivity, Daniel Mattis and Elliott Lieb. 2: 602—1961
Operator formalism in statistical mechanics, Elliott Lieb. 2: 341—1961
Solution of the equations of statistical mechanics, Robert M. Lewis. 2: 222—1961
Some counting theorems in the theory of the Ising model and the excluded volume problem, M. F. Sykes. 2: 52—1961
Use of series expansions for the Ising model susceptibility and excluded volume problem, C. Domb and M. F. Sykes. 2: 63—1961

Statistical Mechanics, Nonequilibrium Theory
Brownian motion of a quantum oscillator, Julian Schwinger. 2: 407—1961
Dynamics of nonlinear stochastic systems, Robert H. Kraichnan. 2: 124—1961
Equipartition of energy for nonlinear systems, Joseph Ford. 2: 387—1961
Exact calculation of the fluctuation spectrum for a nonlinear model system, N. G. van Kampen. 2: 592—1961
Molecular collisions. II. Diatomic molecules, George Gioumousis and C. F. Curtiss. 2: 96—1961
Molecular collisions. III. Symmetric top molecules. George Gioumousis. 2: 723—1961
Nonequilibrium processes in isotopically disordered crystals, Alexei A. Maradudin, George H. Weiss, and Donald W. Jepsen. 2: 349—1961
Nonequilibrium processes in isotopically disordered crystals. Dependence on degree of order, Robert Zwanzig. 2: 370—1961

On the general theory of the approach to equilibrium. II. Interacting particles, F. Henin, P. Résibois, and F. Andrews. 2: 68—1961
On the general theory of the approach to equilibrium. III. Inhomogeneous systems, Frank C. Andrews. 2: 91—1961
Some nonequilibrium properties of a Bose system of hard spheres at extremely low temperatures, Tai Tsun Wu. 2: 105—1961
Statistical dynamics of simple cubic lattices. Model for the study of Brownian motion. II., Robert J. Rubin. 2: 373—1961
Theories of transport in fluids. H. S. Green. 2: 344—1961

Tensor Analysis

Classification of four-dimensional Riemannian spaces, J. F. Schell. 2: 202—1961
Some properties of empty space-time, E. Newman. 2: 324—1961

Theory of Distributions

Analyticity of Wightman functions, Christian Fronsdal. 2: 748—1961
On analytic continuation, multiplication, and Fourier transformations of Schwartz distributions, H. J. Bremermann and L. Durand, III. 2: 240—1961
Support of a field in p-space, G. F. Dell'Antonio. 2: 759—1961

Transport Theory

Exact solution of a critical problem for a slab, Roman Żelazny. 2: 538—1961
General spherical harmonics formulation of plasma Boltzmann equation, Chester P. Carpenter and Fritz W. Mezger. 2: 694—1961
Group-theoretical treatment of time- and energy-dependent multiple scattering with application to the slowing-down of neutrons, E. Guth and E. Inönü. 2: 451—1961
Isoperimetric and other inequalities in the theory of neutron transport, Lawrence Dresner. 2: 829—1961
Tschebyscheff polynomial approximation method of the neutron-transport equation, Shin Yabushita. 2: 543—1961
